

FALL GROSS MOTOR PRINTABLE

Instructions: Print out each page, then laminate for increased durability. Cut out each leaf, then add tape to the tree or velcro to the tree and leaves. Adhere the tree to a parallel surface, then make a pile with the leaves 15-20 feet away from the tree. Have your child pick up a leaf, read the skill, practice the skill all the way to the tree, adhere it, and make their way back to the pile of leaves.

Crab Walk
